DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 5, 6, 8-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Keller, et al (5,924,641).

As shown in the figures, Keller, et al teaches safety system comprising a seat belt frame; a seat belt spool; an energy-absorbing mechanism; a motion sensor and a controller. The energy-absorbing mechanism is a torsion bar. Keller teaches a crash sensor and a slider frame. Keller also teaches the method of determining whether a vehicle occupant is properly restrained by a seat belt with use of the above structural elements as claimed in the present invention.

Allowable Subject Matter

3. Claims 4 and 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
